PREFACE

The conversations contained in TALKING ENGLISH are designed to provide EFL students with examples of spoken English in a communicative mode. Generally, topic areas or settings have not been specified.

The 62 conversations can be used to develop listening comprehension as well as oral fluency. Using the accompanying cassette recording in conjunction with the written text will aid students in developing perception of some of the subtle nuances of American English pronunciation and intonation. Teachers may find that occasional memorization of the conversations for use in role playing will also be beneficial.

Language practice exercises are included with each conversation as well as definitions of possible new vocabulary items.

TEACHING SUGGESTIONS

1. Play the cassette recording twice as students listen with books closed.
2. Have students attempt to reproduce at least one utterance or phrase from listening only.
3. Play the cassette recording again while students listen with books open.
4. Ask students to repeat the conversation without the recording, books open.
5. Play the recording again, instructing students to read along with the recorded voices, striving for the same speed, pronunciation, and intonation.
6. Using the *Conversation-Review* Part D, have students role-play the conversation.
7. Have students repeat the conversation with classmates from memory.

OPTIONAL ACTIVITY

Expanding the conversations to form a type of mini-drama can be a rewarding experience. Students are asked to prepare narrative passages which summarize the action both before and after the episode depicted in the conversation. Using the narrative passages as the basis, student groups/teams prepare dialogue passages which expand the scope of the original conversation and create in effect, a mini-drama. Roles are then assigned and the resulting "playlet" presented as live drama!
